Support to Office of Finance

Biweek Payroll System. The Legislative Pay Increase (LPI), effective pay period 22, was processed on 16 October. The preceeding morning (Thursday, 15 October), President Reagan had signed the authorizing bill. The Office of Finance (OF) requested that the final payroll processing be delayed until 16 October, and that an additional edit process be run the night of 15 October. This gave OF the capability of verifying transactions that were held because of the LPI. They completed their review and resubmitted corrections by 1400 hrs. 16 October. In addition, we modified a payroll program so that the new salaries would be inserted in place of the old salaries for the incoming personnel and CENCO transactions. [redacted]

SUBJECT: ODP Report for Week Ending 14 October 1981

SAFE

On 5-6 October, the COINS Project Management Office (PMO) held a conference to review COINS security and related problems. Mr. [redacted] the SAFE COTR, gave a briefing on the SAFE Project experience with communications security. The response of the COINS PMO to the briefing indicated a high degree of interest in the SAFE experience.

On 7 October, two CSPO representatives attended a briefing sponsored by ORD on the status of a wideband communications system installed at the Los Alamos Scientific Laboratory (LASL) in New Mexico. COMSEC representatives and a representative of the MITRE Corporation also attended the briefing. The presentation was of direct interest to all parties because the LASL system is very similar to both the MITRE and SAFE Wideband Bus Communications systems and involves some of the same major vendors.

Work continued during the week on the installation of the first Burroughs computer in the Northside Computer Center by Burroughs personnel. Diagnostic tests and adjustments are winding up with a benchmark run scheduled for 15 October. Turnover to TRW for acceptance testing is scheduled for 19 October. ODP personnel from the SAFE Computer Operations Branch have begun labeling switches and power panels in the facility. [redacted]

RAMIS Briefing for NSA

On 7 October, the CIA hosted a presentation for NSA describing the implementation and use of RAMIS at the CIA. RAMIS is a proprietary data management system available in ODP's VLSI system for general use. Participants included [redacted]
